

Master of Business Administration: Project Management Specialization

College of Business Administration

SAN DIEGO STATE
UNIVERSITY

Overview

The Master of Business Administration Specialization in Project Management provides students with an academic curriculum focused on planning, leading, organizing, and controlling the resources and schedules of large-scale projects such as software development projects, engineering projects, civic improvement projects, or construction projects. A project is a temporary group activity with the goal to create a unique work product. This specialization provides students with knowledge, skills and techniques to execute projects effectively and efficiently.

MBA Course Requirements

For general MBA program requirements please refer to the Official Program of Study for the Master of Business Administration (MBA).

Project Management Specialization Description

The Project Management specialization is a total of 12 units, as follows:

These FOUR courses are required (12 units)

- MIS 695 – Business Systems Analysis and Design**
- MIS 697 – Project Planning and Development **
- MIS 744 – Lean Six Sigma Quality Management***
- MIS 750 – Strategic Project Management**

Additional Enrichment

Students with a deep interest in a profession in Project Management would also benefit from taking any of these courses:

- MIS 688 – Information Systems in Organizations **
- MIS 691 – Decision Support Systems*
- MIS749 – Business Analytics**
- MGT 721 – Seminar in Group Processes and Leadership
- MKTG 761 – Product Innovation Management

NOTE: Students are responsible to verify prerequisite requirements for the courses they select.

***Offered each semester **Offered once each year ***Offered every other year**

MIS 688 (Information Systems & Strategies in Orgs) is a recommended elective for all MBA students. This class does not count toward the Project Management specialization, but will count towards the remaining electives students need to complete.
