

## **Project Management Career Track MSIS Advising Sheet**

### **Overview**

Project management is the set of knowledge processes that allow organizations to change or create new services, products, business processes, tools, and organizations while managing progress and risk to schedule, budget, and quality throughout the project life cycle. Students will learn how projects are initiated, planned, executed, and monitored and how knowledge is captured for use by future project teams. Project management is the highly valued knowledge in all organizations. For examples, project managers are responsible for launching new products, developing new mobile apps, hosting sport tournaments, and managing alliance programs with strategic partners. This career track provides the opportunity to learn project management principles and tools that apply to any project and industry.
